## Stocks and Bonds. New York, Oct. 28.- The stock market

showed plainly enough this morning that the recent headlong speculation had over-done the prosperous conditions offered by the renewed outside interest in stocks. by the renewed outside interest in stocks. There was a conspicuous absence of any sensational story of vast continental railroad consolidations and new ocean-to-ocean combinations such as were a feature of every day last week. Like a toper, the stock market quickly felt the need of the customary "racer" and began to fall away in a mood of depression. People who bought stocks last week on the strength of some of the startling sto-ries current were uneasy the morning when prices began to go downward, in spite of the absence of bad news, and hastened to sell, adding to the depres-sion. Among professional traders there was a general feeling that a reaction was overdue and they were influenced also by the principle that the week be-fore a national election is a bad time to go long of stocks, owing to the proba-bility of alarmist reports becoming cur-rent. Thus the market ignored various Chicago, Oct. 28.—Wet weather reported, Argentine damage to crop, and a visible increase under expectations were mainly responsible for an advance in wheat today, December closing % to le over Friday. Northern Pacific was inclined to resist the depression all day, and in the last dealings it was run up 2 points from the lowest, giving a better tone to the whole market. The sympathetic rally exceeded a point in a number of cases, but the closing was still below Saturday's level. Money conditions were distinctly easier and the maximum call lean rate was 4 per cent. The tone of the time money market was also easy. Apparently there was no fur ther unessiness over the future of the money market. The news of a further shipment from Australia on Saturday of \$3,000,000 in gold furthered this feeling. Sterling exchange hardened in response to the firmer money market in London, which was a result of the operations of the Bank of England in withdrawing gold from the open market with the purpose of lifting the money rate.
